Michael

Thank you for asking. Yes, you can reproduce the article for the members of the club and credit the author and the ABS. As well, please encourage members of your club to join the ABS. They will be more articles in the works that should be of interest to your members.

Regards
Bob

Bob –

I am a member of ABS and just received the current ABS Journal. I am interested in the article by Cat Nelson – “Root Development in Bonsai” on pages 26 – 29.

I am a Past President of the Phoenix Bonsai Society and am giving a talk and demonstration on Root Pruning to the Club this coming Tuesday, May 14 at our meeting. I have a tree I’m doing a demo on and after reading Cat’s article, I would like to see if I might be able to copy the article in full with all rights as printed with Cat’s name and the ABS Journal information on the bottom and use as a hand-out to the PBS Members for this presentation. I in no way intend to or will claim any credit for the article, other than having read it and wanting to share it in entirety with our Club Members.

Thank you in advance for your consideration and hope to hear from you soon.

Regards,
